Intermediary presentation goals

- Complete account creation/login
  - Account settings/statistics
- Admin account and regular account
  - Allow admin account to see admin-specific statistics
  - Allow admin to create new admins
  - Allow admin to create new categories
- Allow users to CRUD boards and add pins (Basic, does not have to be perfect yet)
- Categories
- Basic implementation of suggestions functionality
- First version of app
- Complete front-end design for all features (Should not necessarily work yet)
- Distributed execution of everything
- Seaching for categories/pins

Tasks:

Keerthana:

- Update front-end pages to suggested design (given by communications students)
- Allow users to CRUD boards and add pins (Basic, does not have to be perfect yet)
- Seaching for categories/pins

Leandre:

- First version of the app

Ken:

- Complete account creation/login
- Basic implementation of suggestions functionality
- Admin account with access to admin-specific statistics
- Allow admin to create new admins
- Allow admin to create new categories
- Setup mysql database with finalized schema's for accounts and statistics

Everyone:

- Complete frond-end design for all features (At least the mockups, everyone can make the ones they need)
- Distributed execution and remote access of everything
